EXECUTIVE SUMMARY

High-impact Full-Stack & AI Engineer with hands-on production experience building enterprise-grade platforms serving thousands of users. Proven ability to architect scalable MERN systems, integrate AI/ML pipelines, and lead cross-functional initiatives — from hackathon strategy to product delivery. Adept at operating with a startup mindset: shipping fast, iterating faster, and owning outcomes end-to-end. Brings rare depth across the engineering stack alongside demonstrated organizational leadership, making them immediately valuable as an individual contributor or team lead.

CORE COMPETENCIES

- | | |
|--|---|
| ✓ Full-Stack Product Development (MERN) | ✓ Blockchain & Decentralized Application Design |
| ✓ AI/ML Integration & Automation Pipelines | ✓ Cross-Functional Team Leadership |
| ✓ Scalable Backend Architecture & APIs | ✓ End-to-End Project & Stakeholder Management |
| ✓ Real-Time Systems (Redis) | ✓ Computer Vision & Deep Learning (CNN) |

PROFESSIONAL EXPERIENCE

Software Developer | Nexcore Alliance LLP

March 2026 – Present

- **NEET720 — AI-Enhanced OMR & Exam Management Platform** [\[Live Product\]](#)
 - Engineered a production-grade, QR-based OMR processing engine in Python that fully automated answer-sheet evaluation and student-grade mapping — eliminating manual grading overhead for thousands of exam entries.
 - Architected AI document processing microservices using FastAPI + Groq Vision to extract questions, text, and diagrams from scanned PDFs, reducing manual data-entry time by an estimated 80%.
 - Triaged and resolved critical backend defects across authentication, API layers, database queries, and business logic — directly improving platform stability, user retention, and trust.
- **myCoachingOS — Enterprise LMS, ERP & CRM Platform** [\[Live Product\]](#)
 - Designed and delivered 50+ product features spanning CRM, Fee Management, Attendance, Analytics, Scheduling, Notifications, and role-based access for admins, staff, students, and parents — functioning as a one-person feature squad.
 - Scaled platform infrastructure using Redis caching and Server-Sent Events (SSE), validating system performance under simulated loads of 100,000 concurrent users — demonstrating production-readiness at enterprise scale.
 - Built a real-time One-to-One Communication module enabling seamless in-platform messaging between students, parents, and management — improving engagement and reducing external tool dependency.
 - Operated as a de-facto technical project manager: scoping requirements, coordinating with stakeholders, and independently shipping features from design through deployment.

EDUCATIONAL PROJECTS

Blockchain-Based E-Voting System — JavaScript, Solidity, Ethereum [\[GitHub\]](#)

- Designed a tamper-proof, decentralized voting platform on Ethereum using smart contracts — delivering verifiable election integrity without a central authority.
- Implemented cryptographic voter anonymization protocols ensuring privacy compliance while maintaining end-to-end auditability — directly addressing real-world election security challenges.

Real-Time Sign Language Detection — Python, CNN, TensorFlow [\[GitHub\]](#)

- Trained a Convolutional Neural Network on the ASL dataset with advanced feature extraction techniques, achieving high real-time gesture recognition accuracy — demonstrating applied ML depth beyond coursework.
- Built a deployable accessibility tool with direct social impact potential for hearing-impaired communities.

Venato — Employee Task Tracker & Scheduler — Java, XML, Firebase [\[GitHub\]](#)

- Developed a full-featured Android task management system enabling role-based task assignment, monitoring, and scheduling — purpose-built for operations and project management use cases.
- Integrated Firebase for real-time data sync and offline reliability, reflecting production-minded engineering practices.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, Solidity
Frontend: React.js, Next.js, Tailwind CSS, XML
Backend: Node.js, Express.js, FastAPI
Databases: MongoDB, MySQL, Firebase
AI & Vision: Groq Vision API, TensorFlow/CNN, OpenCV
Infrastructure: Redis, SSE, REST APIs, Blockchain (Ethereum)
AI Tools: Claude, ChatGPT, Grok, Gemini
Dev Tools: VS Code, Cursor, Antigravity, Git, GitHub, Postman

LEADERSHIP & ORGANIZATIONAL ROLES

Demonstrated consistent leadership across technical and organizational domains:

- **Head Event Organizer — AiCodeX Inter-Collegiate Hackathon · MHSSCE** Aug – Oct 2024
Led a 20-person team; managed end-to-end planning, sponsor coordination, and final showcase for a multi-phase industry-grade hackathon.
- **Secretary, IEEE MHSSCE Students Chapter · IEEE** Mar – May 2025
- **General Secretary, Entrepreneurship Development Cell · EDC** Jul 2024 – May 2025
- **Sports Secretary, Students Association Council of Engineering · SACE** 2025
- **Jt. Admin Head, Students Association Council of Engineering · SACE** 2024
- **Head Event Organizer, Tableau Data Visualization Workshop · MHSSCE** Mar 2024
- **Member, Computer Society of India · CSI** Aug 2019 – Apr 2022

EDUCATION

B.E. in Computer Science Engineering — AI & ML Nov 2022 – May 2025
M.H. Saboo Siddik College of Engineering, University of Mumbai | **CGPA: 8.44 / 10**

Diploma in Computer Engineering Jun 2019 – May 2022
M.H. Saboo Siddik Polytechnic, MSBTE | **Score: 84.06%**

CERTIFICATIONS & COMPETITIVE ACHIEVEMENTS

- AWS Cloud Computing Foundation — AWS Academy (Certified)
- Finalist — Aavishkar Hackathon 2023, University of Mumbai
- Final Round — Techno-Pro 2022, State Level Project Competition (MSBTE)
- Participant — ERR_404 Hackathon 2025 | Aavishkar 2024 | Hack Celestial 2024
- Participant — Smart India Hackathon 2024 & 2023 (Institute Level)
